

Topic: Biotechnology

1. What is one of the key techniques used by scientists in biotechnology?

- model
- material
- genetic engineering
- tool

2. Who was the first person to use the term biotechnology for his research?

- Louis Pasteur
- Károly Ereky
- Gregor Mendel
- Marie Curie

3. What can tissue culture be used for?

- research and medical purposes
- environment
- application
- solution

4. Who first use the word biotechnology to refer to the production of products from raw materials with the aid of living organisms?

- Marie Curie
- Gregor Mendel
- Louis Pasteur
- Károly Ereky

5. Biotechnology uses a range of different techniques to produce products like beer, wine, and cheese?

- chemical process
- bottom fermentation
- vinification
- fermentation

Answer Key

1. genetic engineering
2. Károly Ereky
3. research and medical purposes
4. Károly Ereky
5. fermentation
